EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

This communication is an Examiner's reasons for allowance in response to application filed on 11/19/2001, assigned serial 09/988,304 and titled "Multi-Mode In-Vehicle Control Unit with Network Selectivity for Transmitting Vehicle Data for Fleet Management."

The following is the Examiner's statement of reasons for the indication of allowable subject matter:

The prior art closest to the subject matter of the claimed invention are the references to Razavi et al. (US 6362730) and Dutta et al. (US 5953319A). Razavi et al. directs to a system and method for collecting vehicle information such as location, traffic , diagnosis from a vehicle, and transmitting said vehicle information to an external receiver via a communication device. In Razavi et al, the communication devices such as modem, CDPD modem, and wireless Ethernet are disclosed as the communication are used for the purpose of transmitting data to the external device. The reference to Dutta et al. teaches a wide area mobile communication networks with multiple routing mode options, in which multi-mode mobile communication network provides users the

data transmission rate, data transmission costs, etc. It is found that the combination of Razavi et al. and Dutta et al. would not address the limitations as now claimed in claims 19, 37, 44, and 47. Therefore, the previous art rejection has been withdrawn, and the application is now set in a condition for allowance.
